Sytos Plus® File Backup Manager Version 1.30

An enterprise-wide backup strategy

Your company's data is among your most valuable assets–so nothing is more important than maintaining its safety and integrity.

That's where Sytron's Sytos Plus® Version 1.30 comes in. Sytos Plus is a high-performance backup utility that works with a variety of storage devices on IBM Operating System/2® and DOS systems. With Sytos Plus, you can be assured that your vital data is backed up–safely and completely.

There's more. Sytos Plus' extensive management features make archiving data more efficient than ever before. For example, you can easily transfer files between your storage media and your operating system. That's because the file format feature in Sytos Plus works independently of the operating system.

You'll work fast with Sytos Plus, too. During backups, the program provides maximum throughput for all supported storage devices. Even better, all backed-up files are automatically logged so you can quickly select the ones you need later–for example, when you compare or restore files. And since all setup and selection operations are done through a graphical, intuitive interface, Sytos Plus is easy to use.

Sytos Plus Version 1.30 at work

Here are some of the ways you can put Sytos Plus to work for you:

- Automate PS/2® and LAN Server backup operations with a Scheduler feature
- Safeguard data and files by using individual file restoration and disaster recovery features
- Recover files from damaged backup media with a built-in Error Correction Code
- Archive old or unused files and data quickly and easily with the Move procedure

Feature	Benefit
DOS and OS/2® support	• Provides an enterprise-wide backup solution
Quick File Access	• Enhances performance by quickly locating specific files once they've been selected for a task • Gives you maximum throughput for all supported storage devices
Comprehensive media support	• Allows you to use a broad range of storage media–diskette, hard disk, 1/4-inch tape, digital audio tape, data cartridge, erasable optical disk
Intuitive, graphical interface	• Facilitates procedure setup and selection • Simplifies use of Sytos Plus across different operating systems
Error Correction Code	• Ensures that your data is backed up safely and completely
Procedure Lock	• Allows users to run–but not edit or delete–any of the procedures customized for your backup strategy and system
Scheduler	• Lets you automate procedures and run batch, script or executable files during off-peak hours at predetermined times
Unattended mode	• Increases efficiency by allowing you to run scheduled files without user intervention
Software compression	• Makes the most of your media by compressing files by up to 50 percent of their original size

Sytos Plus Version 1.30 at a glance

Memory requirements	640KB for DOS; for OS/2, 1MB beyond the amount of memory being used for other applications; hard disk required
Software supported	IBM Operating System/2 2.0; IBM Operating System/2 Standard Edition 1.2 and 1.3; IBM Operating System/2 Extended Edition 1.2 and 1.3; IBM DOS Version 3.3 or higher
Hardware supported	IBM PS/2 Models 25, 25 286, 30, 30 286, 50, 50 Z, 60, 70 386, 70 486, 80 386, 90 486 and 95 486; IBM Personal Computer; IBM Personal Computer XT;™ IBM Personal Computer AT;® IBM Personal Computer XT Model 286
Networks supported	Novell Netware® 286, Netware 386 (v 3.11); 3Com;® IBM PC LAN Program; IBM OS/2 LAN Server 1.2, 1.3 and 2.0
Tape devices supported	IBM 6157 Tape Drive Models 001 and 002; IBM PS/2 2.3GB External Full High SCSI Tape Drive; IBM PS/2 2.3GB Internal Full High SCSI Tape Drive; IBM PS/2 3.5-inch Rewritable Optical Drive; diskette
